Thanks for the update, John. We have the operational viewer front and center in our EOC. So far most of the inquiries I've received were from the PIO folks about getting a graphic/data out to the public, which I pumped the brakes on. If there's a public facing viewers ready to roll I think that will have them covered. Otherwise, I suggested creating a web map in the GeoPlatform and embedding that in the www.epa.gov/goldkingmine site. I did receive an inquiry from a water utility in California, but I passed that along to our FOIA specialist in the EOC.

All of our correspondence and products in the EOC are routed through our EOC position specific inboxes for FOIA purposes, so we will have a record stored.

I'll keep you posted of any developments here.

Best,

Josh Krochmal

Hi Josh,

Scott Augustine suggested I touch base with you. My involvement with the current emergency response is cursory but could increase in the coming weeks. There is one operational viewer that is being used by R6, R8, and R9. My understanding is that a public facing viewer is pending HQ approval.

Please keep me informed of any inquiries you may be receiving regarding this emergency response. Also be aware that there is already a litigation hold in place and multiple FOIAs, so preserve any correspondence, documents, and work products may you be involved in.

Thanks,

John Wieber
